

AEPC™ and PAMA Announce the Creation of a Scholarship Program for Aircraft Maintenance Technicians

Cooper City, FL – October 6, 2017 - Today, AeroEngine Protection Corp (AEPC™) and the Professional Aviation Maintenance Association (PAMA) announced the formation of a scholarship program for individuals interested in a career as an aircraft maintenance technician. Aircraft maintenance technicians are the lifeline of the aviation industry as they are responsible for keeping aircraft flying by maintaining the aircraft to the safety standards mandated by the Federal Aviation Administration (FAA). As more aircraft are produced over the next several years, the need for qualified aircraft maintenance technicians will continue to grow exponentially.

Recognizing this critical need, the goal of the AEPC™ and PAMA scholarship program is to increase education opportunities for individuals interested in working in the aviation industry as an aircraft maintenance technician. “The aviation industry needs bright young minds to meet the growing needs of the industry, stated John Goglia, Chairman, PAMA. “This scholarship program will provide a catalyst for those individuals interested in the industry who do not have the financial means to obtain the necessary training.”

“Education is a vital foundation for creating fulfilling, advantageous careers in the aviation industry,” stated Ron Zilberbrand, CEO of AEPC™. “We are proud to help individuals interested in the aviation industry achieve their goals in building a successful career within the industry.”

The scholarships are designed to cover educational expenses including tuition, books and other fees. Learn more about the AEPC™ and PAMA Scholarship program.

About AEPC™

Founded by aviation industry professionals with decades of experience, AEPC™ offers the only **Piston Engine Service Programs** (PESP™) for the general aviation industry. By utilizing data from large fleet operations and more than 4,000 piston aircraft engine overhauls, AEPC™ delivers a full-range of scheduled and unscheduled Piston Engine Service Programs.

For more information about AEPC™'s family of PESP™ programs can help you control your maintenance budgets, visit www.aepc.aero, email AEPC™ at requests@aepc.aero or call Ron Zilberbrand at 312-961-0932 or Ken Dufour at 815-633-1684 or Remi Szymanski at 941-726-5439.

About PAMA

PAMA is a national association with nation-wide chapters dedicated to enhancing professionalism and recognition of the Aviation Maintenance Technician through communication, education, representation and support for continuous improvement in aviation safety.
